PROFESSIONAL SUMMARY

Full Stack Developer with 8 months of professional experience building scalable backend services and frontend applications using Python (Django), Node.js, React.js, MySQL, and MongoDB. Proven ability to design and optimize REST APIs, integrate third-party CRM-like systems, and implement authentication (OTP/JWT) in production environments. Collaborative team player committed to continuous learning, taking ownership of systems, and delivering reliable, high-quality software.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL

Backend: Node.js, Django | Frontend: React.js, Next.js, React Native, Angular (Basic)

Databases: MySQL, MongoDB | APIs: REST API design, API integration, Client-server architecture

Auth & Security: JWT, OTP Authentication, RBAC | Practices: Code reviews, Git workflows, production debugging

Tools: Git, GitHub, Postman, VS Code | Cloud: AWS S3, Firebase, Vercel, Azure (basics)

Soft Skills: Curiosity, problem-solving, collaboration, continuous learning, willingness to learn

PROFESSIONAL EXPERIENCE

Software Developer | Synclovis Systems, Bengaluru

Feb 2025 – Present

Visitor Management System

Tech Stack: Next.js, Django, MySQL, Tailwind CSS, TypeScript

- Designed and maintained 15+ REST APIs for visitor registration, OTP authentication, and dashboards, improving data retrieval speed and enabling high-volume request handling
- Built an RBAC system supporting Admin, Employee, and Watchman roles, reducing manual permission handling by ~60% and improving access reliability
- Optimized SQL queries and backend logic, reducing API response times by improving query efficiency under load
- Integrated DigiLocker-based identity verification, eliminating manual document checks and reducing onboarding time

AI-Powered Quotation & Pricing Engine (Client Project)

Tech Stack: Node.js, MongoDB, MySQL

- Built OTP-based authentication APIs with a measurable reduction in unauthorized access incidents post-deployment
- Designed cross-database backend integrations between MySQL and MongoDB, handling data synchronization across enterprise workflows
- Improved API throughput by restructuring async data flows, reducing processing bottlenecks in the quotation pipeline

Recruitment & Job Marketplace Platform (CRM Integration)

Tech Stack: React.js

- Collaborated with the team to build job listing and application modules for a CRM-like platform, streamlining recruiter and candidate workflows
- Refactored shared UI components in React, reducing duplicate code and cutting feature development effort by ~30%
- Integrated Google Analytics and Tags, enabling the product team to track user behavior and improve data-driven decisions
- Improved cross-device responsiveness, ensuring consistent UX across desktop and mobile

School Management System

Tech Stack: React Native, Angular (Basic), MySQL

- Developed a fees analytics dashboard providing actionable financial insights, and a personalized timetable module for staff
- Implemented multilingual support (i18n) and improved mobile navigation flow, increasing accessibility for a diverse user base

Full Stack Intern | KodNest, Bengaluru

Jun 2023 – Feb 2024

- Built and tested web features using React.js, participating in code reviews and iterating on feedback from senior developers
- Developed foundational skills in REST API design, SQL query writing, and version control using Git

PROJECTS

A Vigilant CPS Shield to Thwart Attacks Project

Tech Stack: *Python, Machine Learning, Cyber Security, Anaconda, Spyder*

- Developed a CPS security system to detect and prevent man-in-the-middle attacks.
- Implemented anomaly detection to identify threats and secure network communication

Image Steganography

Tech Stack: *Java*

- Built a Java application using the LSB algorithm to encode and decode hidden data within images, with integrity validation on decoding

EDUCATION

B.Tech – Computer Science and Engineering | Vignan's Lara Institute of Technology and Science, Guntur
May 2020 – May 2024

ACHIEVEMENTS

- Ranked 1787 in TCS CodeVita Season 11 (national competitive programming contest)
- Solved 150+ problems across LeetCode, CodeChef, and GeeksforGeeks
- NPTEL Certified in Data Structures and Algorithms using Java (Elite)
- 2-Star Coder on CodeChef
